

Business Planer NB & T

Corus Kalzip Systems Central Office is seeking a Business Planner with accomplished professional experience, plus demonstrated analytical skills and a comprehensive understanding of the building industry for our New Business & Technology (NB&T) department. Primary responsibilities include market studies and business analysis for new business opportunities and promising product ideas. This individual will work closely with the Kalzip BU operational marketing manager, customers and the existing NB&T engineers and designers.

Job Responsibilities

- Develop future product strategies based on market analysis, competitive intelligence and customer feedback
- Provide decision making aid by supplying business plans comparing different scenarios and perform value added financial analyses to evaluate alternatives
- Provide thorough assessment of risks and opportunities related to markets and product ideas
- Provide project management and analyses for a variety of ad-hoc initiatives, including but not limited to business scenario modelling, process improvements, business case development, etc.
- The position requires regular interaction with senior management or executive levels on matters concerning several functional areas, regions and/or customers

Skills and Requirements

- Our preference would be somebody with a business economics background and a proven interest in engineering or the other way around. Other candidates with a convincing mix of appropriate education and professional career are invited to send us their application.
- A minimum of 2+ years of work experience, preferably in the building industry
- Candidate must be a strategic thinker and detail-oriented
- Exceptional communications and interpersonal skills
- Advanced proficiency in concise financial modelling and plain spreadsheet creation (intermediate/advance knowledge of excel is a must)
- Proven capability in strategic problem framing, issue identification, and the development of practical business solutions
- Strong writing, presentation, and analytic skills with the ability to interact and influence all levels within the organization
- Requires the ability to change the thinking of or gain acceptance of others in sensitive business situations
- Well-structured English a must, German skills would ease your daily work

Do you like to work independently, sometimes with little supervision? Do you feel good and you always stand your ground in a fast-paced, exciting, fun and challenging workplace? Come to us!

NB&T shall be understood as a product development service provider for the complete world-wide Kalzip Business Unit. Therefore, you will have the opportunity and challenge to think and act global, to work with high qualified and motivated colleagues from all our different locations and to play an important role in creating the future trends of Kalzip.

Kalzip

Kalzip is part of Corus, a worldwide operating steel and aluminium company, employing approx. 42,000 people around the globe.

Part of Corus is Kalzip, a global, innovative, fast growing and customer oriented company that develops, produces and distributes roof and wall cladding systems. The Kalzip® products are well known and enjoy an excellent reputation among building planners and architects worldwide. Since the market launch in 1968, over 70 square metres of Kalzip standings seam profiled sheets have been installed on roofs and facades around the globe.

The Business-Unit Kalzip employs 500 people. Production facilities are located in Koblenz, Germany; Haydock, United Kingdom; Singapore; Guangzhou, China and Michigan, United States. There are 22 sales offices worldwide.

Our Mission Statement

To be the customers preferred international supplier for building envelopes.

You are invited to both share and broaden your knowledge within a fresh and multidisciplinary team. Working for NB&T you will be part of the Kalzip BU Central Office, located in Koblenz/Germany.
