
Discussing standing seam; 21st Century Design

Kalzip specialises in the international manufacture and supply of standing seam roofing and wall cladding systems for building envelopes.

Systems are precision engineered, carry BBA approval and are fully compliant with legislation and standards.

Seminar details

Discussing standing seam; 21st Century Design is a forward thinking, practical seminar that provokes open discussion and audience participation adding a more bespoke element to the core syllabus of the content.

Comprehensive in its form and content the presentation tackles the pertinent issues faced by the industry offering a step by step guide through the building regulations and standards, sustainability and technical considerations all of which are fundamental to future system design and performance.

The key objectives of the seminar are to;

- highlight and discuss those areas that will have the greatest impact
- provide guidance on what the industry can offer, assisting the design team in their specification

It considers key performance criteria, sustainable construction and future design opportunities demonstrating state-of-the-art technology and latest innovations to the market.

This, together with an overview of related component design covering technical detailing, product application and construction techniques will enable specifiers to make more informed decisions about their roofing specification.

Also available

Product literature, standard and typical details (CD), technical information sheets, websites, NBS specifications.

To book a CPD

To book a CPD or for further information Tel: 01942 295500 or email cpd@corusgroup.com.

Bookings can also be requested through the main Kalzip website at www.kalzip.com

To enable us to tailor the seminar to your specific requirements please indicate below the key areas you would like us to focus on.
